-1- FUNCTION: BINDS SPECIFICALLY TO PHOSPHORYLATED IKB ALPHA

(PIKAPPABALPHA) AND PHOSPHORYLATED BETA-CATENIN AND PROMOTES THEIR

UBIQUITINHATION AND DEGRADATION.

-1- SUBUNIT: PART OF A SCF (SKPI-CULLIN-F-BOX) PROTEIN LIGASE COMPLEX.

-1- SUBCELLULAR LOCATION: CYTOPLASMIC.

-1- ALTERNATIVE PRODUCTS: 2 ISOPOMAS; 1 (SHOWN HERE) AND 2; ARE

PRODUCED BY ALTERNATIVE SPLICING.

-1- SIMILARITY: CONTAINS 7 WD REPEATS (TRP-ASP DOMAINS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Margottin F., Bour S.P., Durand H., Selig L., Benichou S., Richard V., Thomas D., Strebel K., Benarous R.; A novel human WD protein, h-beta TrCp, that interacts with HIV-1 Vpu connects CD4 to the ER degradation pathway through an F-box motif."; Mol. Cell 1:565-574(1998).

Submitted (SEP-1994) to the EMBL/GenBank/DDBJ databases.

-!- FUNCTION: THIS PROTEIN IS ESSENTIAL FOR INTITATION OF DNA

REPLICATION AND SEPARATION OF THE SPINDLE POLE BODIES TO FORM THE
POLES OF THE MITOTIC SPINDLE. IT ALSO PLAYS A ROLE IN BUD
DEVELOPMENT, FUSION OF ZYGOTIC NUCLEI AFTER CONJUGATION AND
VARIOUS ASPECTS OF SPORULATION. REQUIRED FOR HTAL-HTBL LOCUS
TRANSCRIPTION ACTIVATION.

Kumar A., Paietta J.V.;

"The sulfur controller-2 negative regulatory gene of Neurospora crassa encodes a protein with beta-transducin repeats.";

Proc. Natl. Acad. Sci. U.S.A. 92:3343-3347(1995).

-! FUNCTION: NEGATIVELY REGULATES SULFUR STRUCTURAL GENE EXPRESSION.

-! INDUCTION: EXPRESSED ONLY UNDER LOW-SULFUR CONDITIONS.

-! SIMILARITY: CONTAINS 8 WD REPRATS (TRP-ASP DOMAINS).

-! SIMILARITY: BELONGS TO THE MET30/SCONB/SCON-2 FAMILY OF WD-REPEAT PROTEINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       106 RITSVQPPTGLQEWLKMFQSWSGPEKLLALDELIDS-CEPTQVKHMMQVIEPQFQRDFIS 164

E., Mondoza M.G., Nalsmith T.V., Kolman M.F., Egelhoff T.T.;

"Identification of a protein kinase from Dictyostelium with homology
T to the novel catalytic domain of myosin heavy chain kinase A.";
J. Biol. Chem. 272:11812-11815(1997).

- FUNCTION: PHOSPHORYLATES THREONINE IN THE C-TERMINAL TAIL REGION
OF WYOSIN II HEAVY CHAIN. THIS PHOSPHORYLATION IS CRITICAL IN
REGULATIC ACTIVITY: ATP + [MYOSIN HEAVY-CHAIN] = ADP +
[MYOSIN HEAVY-CHAIN] PHOSPHATE.

- I CATALYTIC CONSISTS OF AN WITERMINAL DOMAIN MITH SEVEN WD REPEATS.

- DOMAIN: CONSISTS OF AN GREENING DOMAIN WITH SEVEN WD REPEATS.

- SIMILARITY: GOWAINS 7 WD REPEATS (TRP-ASP DOMAINS).

- SIMILARITY: BELONGS TO THE MHCK / EF-2 PROTEIN KINASE FAMILY.
                                                                                                                                                                                                                                                                                                                435
                                                                                                                                                                                                                                                                           482
